

## PRESS RELEASE

### **Gridspertise emissions reduction targets approved by SBTi, Science Based Target initiatives**

*Milan, 5 March 2026* - **Gridspertise**, a technology company owned by Enel and CVC Capital Partners providing smart solutions for the modernization of power grids, announces that the **Science Based Targets initiative (SBTi)** has approved its near-term science-based emissions reduction target, confirming that the targets covering greenhouse gas emissions from company operations (scopes 1 and 2) are consistent with reductions required to keep warming to 1.5°C. This validation marks a significant milestone in the Group's sustainability strategy and reinforces its long-term commitment to tackling climate change and reducing environmental impact across its entire value chain.

Gridspertise commits to reduce absolute scope 1 and 2 GHG emissions 54.6% by 2033 from a 2023 base year. Gridspertise also commits that 70.0% of its suppliers and customers by emissions covering purchased goods and services and use of sold products, will have science-based targets by 2030.

Through the validation of its targets by SBTi, Gridspertise confirms its determination to contribute concretely to global emissions reduction efforts. Moreover, the Company encourages partners, suppliers, and stakeholders to align with climate science by committing to science-based 1.5°C pathways.

This initiative reflects Gridspertise's will to advance the structural transformation of energy distribution systems by embedding environmental responsibility into its strategic vision, technological innovation and operational governance. To do so, the company supports Distribution System Operators in accelerating the digitalization of their grids through advanced cloud-edge technologies, thereby contributing to the broader evolution of the energy system. Moreover, committing to science-based targets reflects a clear strategic choice of reducing operational emissions, while engaging the majority of suppliers and customers in the same direction and it requires the systematic integration of decarbonization across Gridspertise's governance, technology development and operational processes.

### **About the Science Based Target initiative (SBTi)**

The Science Based Targets initiative (SBTi) is a corporate climate action organization that enables companies and financial institutions worldwide to play their part in combating the climate crisis. SBTi defines standards, tools and guidance which allow companies to set greenhouse gas (GHG) emissions reductions targets in line with what is needed to keep global heating below catastrophic levels and reach net-zero by 2050 at latest.

SBTi partners are CDP, the United Nations Global Compact, the We Mean Business Coalition, the World Resources Institute (WRI), and the World Wide Fund for Nature (WWF)

### **About Gridspertise**

Gridspertise Group is the technological partner that delivers intelligent solutions for grid modernization in a flexible and reliable way, developing integrated devices, cloud-edge based solutions and services that enable, manage and optimize smart grids.

Set up in 2021 as a carve-out of Enel's experience in developing and scaling up digital grid technologies, Gridspertise became an independent company in 2022 and, in 2023, acquired Aidon a smart metering leader in the Nordics, which was founded in 2004. In 2025, Gridspertise acquired Energyworx, a pioneer in cloud-based Energy Data Management solutions, headquartered in the Netherlands

Gridspertise, Aidon and Energyworx consolidate their over 200 customers worldwide and 20+ years of know-how in smart grids and smart metering in Gridspertise Group, jointly owned by Enel and CVC Capital Partners. Discover more at [gridspertise.com](https://gridspertise.com)
